

VA Rehabilitation Research & Development Service

[RR&D Main Page](#)

To responsibly evaluate and
disseminate scientific
research findings impacting
the rehabilitative healthcare
community

Guidelines for Contributors

Purpose and Scope

The *Journal of Rehabilitation Research and Development (JRRD)* is a peer-reviewed scientific publication in the multidisciplinary field of disability rehabilitation. *JRRD* responsibly reports the results of rehabilitation research relevant to veterans. Our goal is to publish cutting-edge research that enhances the quality and relevance of Department of Veterans Affairs (VA) rehabilitation research and disseminate biomedical and engineering advances. Priority areas are prosthetics, amputations, orthotics, and orthopedics; spinal cord injury and other neurological disorders (with particular interest in traumatic brain injury, multiple sclerosis, and restorative therapies); communication, sensory, and cognitive aids; geriatric rehabilitation; and functional outcome research. *JRRD* receives national and international submissions.

Only original scientific rehabilitation research and development papers (including pilot studies) are accepted. *JRRD* requires authors to document institutional review board procedures on human subjects and procedures on institution's on animal experiment.

Manuscripts accepted are-

- Technical reports describing techniques, procedures, or findings of original scientific research.
- Clinical reports that evaluate the development of a particular prototype, a new clinical technique, or any other topic of clinical interest.
- Selected reviews.
- Special reports.
- Book reviews.

Letters to the Editor are encouraged. We hope to open an ongoing dialogue between professionals as a means of exchanging information and sharing diverse opinions among disciplines. Letters should relate specifically to material published in *JRRD*. The following information must be supplied: full name of author of article, volume and issue number, and page numbers on which the article appeared. In addition, the letter should contain the full name, academic degree(s), and affiliation of the correspondent.

Review Process

Scientific papers submitted to *JRRD* are subject to critical peer review by experts in the field. A paper's suitability for publication rests on the results of the peer review.

Instructions to Contributors

Authors shall prepare manuscripts in accordance with the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" developed by the International Committee of Medical Journal Editors (www.icmje.org). Manuscripts shall-

1. Be original and in English.
2. Contain a title, abstract, alphabetized key words, abbreviations, introduction, methods, results, discussion, conclusion, acknowledgments, references, and tables and figures and their captions.
3. Be submitted on-line to <http://jrrd.manuscriptcentral.com> in 12-point font, double-spaced with liberal margins, and appropriately paginated for 8 1/2 in. × 11 in. white paper following all instructions given during the submission process. Specifically:
 - Include a cover letter submitted on-line (screen 9) stating the name, credentials, affiliation, address, telephone number, fax number, and email address of the corresponding author.
 - List sources of funding on the title page of manuscript, including grant number, and indicate on-line during the submission process (screen 1) if funding is received from the Veterans Administration RR&D service.
 - Include a paragraph describing the clinical relevance for the veteran. This plain-text, unformatted summary should be separate from the manuscript. The clinical relevance should include these four subject headers: purpose of the work, subjects and/or procedures, results, and relevance to the veteran population. This should be uploaded (screen 11) after the full text and figures of the manuscript are uploaded.
 - Include a signed statement of originality (with all authors' full names and academic degrees) confirming that the contribution has not been published by or submitted to another journal. A blank form can be downloaded during the submission process from http://jrrd.manuscriptcentral.com/author_instructions/Originality_Statement.pdf (also available in Word @ http://jrrd.manuscriptcentral.com/author_instructions/Originality_Statement.doc) and either emailed, faxed (410-962-9670), or sent by regular post to the *JRRD* Editorial office.
 - Include figures (photos, illustrations, graphs) submitted as **ONE** file which can not exceed 2,000 x 2,000 pixels (.tif, .eps, or .jpg) during the on-line submission process. Use 8- to 12-point Arial bold font for charts and graphics. For full details, see Technical Specifications in the *Guidelines for Contributors* at www.vard.org.
 - List at least two preferred and any nonpreferred reviewers on the appropriate screen (7 and 8 respectively) during the submission process.
 - Preview your complete on-line submitted manuscript before the end of the submission process as directed in screen 12. Please notify the *JRRD* Editorial office of manuscripts@vard.org if you do not receive an email confirmation of receipt of your upload with 24 hours.

4. Be submitted on a nonreturnable 3 1/2 in. disk, CD, or 100 MB Zip[®] disk containing a copy of the finalized text of the manuscript and another separate CD or 100 MB Zip[®] containing all figures (photos, illustrations, graphs) in a PC Windows format (.tif, .eps, or .jpg) after the manuscript has been accepted for publication. **Macintosh-formatted disks are unacceptable.**

5. Be subject to color reproduction charges for color figures. *JRRD* will now feature color figures in print as well as on-line. Color pages will be published at a nominal charge to authors of \$500 per page and authors will receive a copy of the charge form to be completed before a manuscript is published. Please note that any delay in returning the color charge form will cause a significant delay in the publication of the manuscript.

For full details, the complete ***Guidelines for Contributors*** is published on-line: www.vard.org/guid/guidelns.htm. Send all manuscripts, correspondence, and inquiries to the Editor, *Journal of Rehabilitation Research and Development*, 103 South Gay Street, 5th floor, Baltimore, MD 21202-4051; 410-962-1800, ext. 240; email: pubs@vard.org or manuscripts.vard.org.

Abstracts: Shall be limited to 150 words and submitted with the manuscript. Shall give the factual essence of the article and be suitable for separate publication in index journals.

Key Words: Three to ten alphabetized key words, preferably terms from the Medical Subject Headings, Index Medicus.

Abbreviations: The first time an uncommon abbreviation appears, it should be preceded by the full name or phrase for which it stands. List the abbreviations used in the paper in the first footnote.

Section Headings: Introduction, Methods, Results, Discussion, Conclusions, Acknowledgments, and References (see *Chicago Manual of Style*, In: Bookmaking. 14th ed. Chicago: The University of Chicago Press; 1993. p. 3-156).

Technical Specifications

Figures: Graphics (i.e., drawings or illustrations, schematics, charts, graphs, etc.) and photos may be used for clarifying the text. After your manuscript has been accepted for publication, ensure all images are-

- Reduced to 3 1/2 in. (8.9 cm) wide. (Some special images may be 7 1/4 (18.4 cm) in. wide and no more than 7 1/2 in. [19 cm] high.) We recommend that Authors design supporting artwork at 3 1/2 in. wide and inspect their figures at this size to ensure readability. Chose various colors and patterns that provide enough contrast as black and white images. Using Arial, 8 to 10 point, **bold**, works well for text with 3 1/2 in. wide images.
- Sent as separate electronic **PC** files (not Macintosh) in .tif, .eps, or .jpg format on CD or 100 MB Zip[®] disk. Do not embed the images in the text.
- Sent as hard copies and numbered. Include the word "TOP" and figure number on a typed label affixed to the back of each figure.
- NOT sent in PowerPoint or CAD-CAM format. If images are created in MSFT PowerPoint, you must print them at 1200+ dpi **directly** from PowerPoint onto high-quality, smooth, and bright-white 32 lb paper. Then you must scan them at 400+ resolution as .tif. or .jpg files. This

will provide a sharp .tif image. If the image is saved as a .tif or .jpg directly from PowerPoint, the image will **not** be sharp; it will be soft and of poor quality. This method is therefore UNACCEPTABLE. The same applies to any other program that does not convert files as clean sharp printable images.

Ensure all **Graphs** are-

- Scanned at 400 dpi and printed at 1200+ dpi on nonglossy 32 lb and 94+ brightness premium paper.
- Sufficiently distinguished by texture, pattern, and/or size when they include data lines on colored graphs to be identifiable in black and white at 3 1/2 wide.

Ensure all **Photos**-

- Are scanned at 400+ dpi and saved as .tif or .jpg files. (Using .tif files is best, but they are larger files.)
- That are digital are printed on glossy photograph paper or high-quality, smooth, and bright-white 32 lb paper at 1200+ dpi. No external titles or labels are permitted. Place figure number on top of back.
- That are standard lab prints are printed on glossy paper in a 4 × 6 in. or 5 × 7 in. format in black and white or color with good contrast; use no tape or paper clips on photos.
- That are in colors provide enough contrast as black and white images. Unacceptable illustrations and photos will be returned for revision.

Note: Most high-quality image (sharp and with good contrast) files are too large for 3 1/2 in. disk; use CD or 100 MB Zip[®] disk.

References: References should be typed separately, double-spaced, and numbered consecutively in the order in which they are first mentioned in the text. References cited in tables or figures must be first cited in the text and then they can be cited in tables or figures. "Unpublished observations" or "personal communications," for which the author has secured permission of the person cited, should be treated as footnotes and not included in the numbering of the references. Authors are responsible for the accuracy of their references. Please follow these sample formats, which are the Vancouver style:

Article. Gilsdorf P, Patterson R, Fisher S. Thirty-minute continuous sitting force measurements with different support surfaces in the spin. Outcome analysis in comprehensive rehabilitation. In: Fuhrer MJ, editor. Rehabilitation outcomes. Spinal cord injured and able-bodied. J Rehabil Res Dev 1991;28: 33-38.

Chapter in a Book. Phillips SJ, Whisnant JP. Hypertension and stroke. In: Laragh JH. Brenner BM, editors. Hypertension: pathophysiology, diagnosis, and management. 2d ed. New York: Raven Press; 1995. p. 233-39.

Published Proceedings Paper. Kauzlarich JJ, Thacker JG. Antiskid wheelchair brake design. Proceedings of the 14th Annual RESNA Conference; 1991 Jun 21-26; Kansas City (MO). Washington, DC: RESNA Press; 1991. p. 143-45.

Tables: Tables should be submitted as text files, e.g., Microsoft Word-DO NOT submit tables as image files or embed them in the Word file. Tables should not duplicate material in text or illustrations. They should be

numbered consecutively with Arabic numerals cited in the text. Each table should be typed double-spaced on a separate sheet and should have a brief caption and/or legend. Short or abbreviated column heads should be used and explained. Sources should also be cited in footnotes, if applicable.

Mathematical Formulas: Traditional mathematical expressions should be extended by adding brief narrative notes of explanation and definitions of all terms and variables, as appropriate, to ensure that readers of other disciplines gain the fullest understanding of the material presented. The Metric System is requested for use in all quantities in text, tables, and figures.

Permissions and Copyright

JRRD articles published and their original illustrations (unless borrowed from copyright sources) are in the public domain. To use illustrations from copyright sources, authors must acquire written permission from the copyright owner, to include full information about previous publication and credit to be given. Authors must obtain permission to reproduce figures, obtain signed release forms to use photographs containing identifiable persons, and submit originals of those signed documents with the manuscript. Authors must also obtain permission to cite unpublished manuscripts.

Review of Proofs

Proofs will be sent to the corresponding author, unless otherwise requested. To avoid delays in publication, check the proofs immediately and return corrections or changes to *JRRD* either by email, fax, or express mail within three working days. If corrections and/or changes are not received within the prescribed time, it will be assumed none is needed.
